

George Jinhong Wu

Date of Birth:August 2006

Location: Guangzhou, China

Email: mankindgeorge07@gmail.com

Hometown:Jieyang, Guangdong

Education

Sep 2024 – Present

GDUFE

B.S. in Data Science & Big Data Technology

Relevant Coursework: Data Structures & Algorithms, Database Systems, Operating Systems, Applied Regression Analysis, Data Governance, Unstructured Data Mining, Algorithm Analysis & Design, Optimization Methods, Data Collection

Project Experience

Nov 2025 – Jan 2026

Pazhou Algorithm Competition

Model Fine-Tuning

- **(S→T)** Competed to improve model recognition accuracy on a designated test set through fine-tuning techniques
- **(A)** Fine-tuned a pre-trained LLM using ms-swift framework with LoRA (Low-Rank Adaptation) for parameter-efficient tuning; iterated on training strategies and hyperparameter configurations across multiple rounds
- **(R)** Systematically evaluated the fine-tuned model on test sets, analyzing metrics and applying targeted optimizations to improve recognition accuracy; won Third Prize

May 2025

Qinhu Cup

AI Application Developer

- **(S→T)** Addressed the challenge of fragmented job market information and lack of personalized career guidance for university students
- **(A)** Built an intelligent employment platform using LangChain + RAG architecture; crawled job postings and combined with curriculum data to create a structured database; implemented RAG pipeline with Embedding models for semantic vectorization; designed prompts via Prompt Engineering for resume-job matching, job recommendations, and trend analysis
- **(R)** Delivered a functional AI-powered employment platform that enabled intelligent resume-job matching and personalized recommendations; won Third Prize

Jun 2026 – Present

Full-Stack Blog Platform

Independent Developer

- Developed a full-stack blog system using Nuxt3 + NestJS + PostgreSQL; deployed via Docker with GitHub Actions CI/CD for automated release workflows

Sep 2024 – Jun 2025

Youth Volunteer Association

Member

- **(S→T)** Required to organize and execute multiple volunteer events across diverse community settings within one academic year
- **(A)** Planned and coordinated 10+ events including elderly care visits, primary school tutoring, and campus sustainability initiatives; managed volunteer assignments and on-site operations
- **(R)** Achieved high volunteer participation rates and received positive feedback from all partner organizations

Honors & Awards

National Second Prize, China Education Robot Competition
Third Prize, Pazhou Algorithm Competition
Third Prize, Qinhu Cup

Outstanding Individual, "Thousands of Villages" Program
Excellence Award, GDUFE AI Capability Competition

Skills

Languages: CET-4 (College English Test Band 4); proficient in reading English technical documentation

AI Application Development: LangChain, RAG (Retrieval-Augmented Generation), LLM Application Development, Intelligent Agent Construction

Data Engineering: Web scraping (Python), structured data modeling, data cleaning & governance

Programming: Python (Pandas, NumPy, Matplotlib), C, Java

Full-Stack: Vue/Nuxt3, NestJS, Docker, PostgreSQL, CI/CD
